I want to take a picture from my iOS device and then post it to my server(with Rails). But after some research, I don't know how I can do it with GMaps4rails. Can I? Can you suggest me some codes, or tips? A: It depends what you mean by 'post it to my server', but assuming that's a blog application, you would just follow the standard Rails blog tutorial. In addition to the features of GMaps4rails, it allows you to use many of the same capabilities of the native iOS camera, like automatic geotagging, that you would use in a native application.
