
Autodesk Inventor 2013 (32-bit) Crack

A: The Inventor software is only 32-bit. As you'll see in this list of Autodesk products that are 32-bit only: So you need a 64-bit operating system. The invention relates generally to an instrument panel having a device for storing and quickly displaying a map. The device, usually referred to as a map holder, comprises a storage compartment for holding the map, a drawer for retrieving and storing the map, and a cover for exposing the map to view when in use. In addition, the map holder may be provided with a transparent portion at the front to display a view of the area in which the vehicle is operating. More specifically, the invention relates to an improved map holder which uses a storage compartment for storage of a map and a cover that is pivotally attached to the compartment door and a draw member attached to the drawer for movement therewith to retrieve and store the map. The cover is pivotally attached to the compartment door and is spring loaded to automatically present the map to view. Devices for the display of a map to aid a driver in navigating from a current vehicle position to a desired destination are well known in the art. Typically, such devices comprise a map holder that is pivotally attached to the instrument panel of the vehicle. One portion of the map holder contains a map that is visible to the driver when the map holder is in its horizontal position. In this horizontal position, the map holder is located in the center of the instrument panel with one of its side edges proximate the driver. When the driver desires to view a map, he/she opens the drawer which slides out from the map holder. The drawer contains a map that is visible to the driver as he/she opens the drawer and slides the map into the drawer. Typically, the map holder and the drawer are interconnected by a hinge and a drawer pull. The hinge and drawer pull are located at the front of the map holder, as the driver views the map. In order to view the map, the driver moves the map holder to its horizontal position. The drawer is then pulled outwardly to open the drawer containing the map. The drawer contains a transparent portion for showing the map to the driver as he/she looks toward the map holder. The drawer includes
