monitored, and Keymacro will collect, analyze and summarize all data it receives. Features: 1. Easily View All Network Traffic Data Keymacro can collect, analyze and summarize all network traffic data. Not only does it show you in detail the data received from the monitored network connection, it also keeps a summary of all traffic data sent and received by the monitored network connection in a handy list. 2. Graphical Display of Network Traffic Data Keymacro not only displays all the data, but also graphically displays it for you. The real-time traffic chart provides you with a quick, informative and user-friendly overview of the traffic state of the monitored network connection. The traffic chart can be automatically updated in real-time, and the traffic chart displays at the same time the data that Keymacro is collecting from the monitored network connection. 3. Configure Network Traffic Monitoring Keymacro can be easily configured to monitor any network connection. Simply select the network connection to be monitored in the list, choose its source, destination, destination port, protocol and traffic mode from the drop-down menu, enter the IP address or host name of the source of the network connection, and then click "Start". If your computer is connected to a switch, you can configure the switch port of the monitored network connection as well. If you are not connected to a switch, Keymacro can automatically detect the destination port of the monitored network connection and automatically configure the monitor port. 4. Numerical Display of Network Traffic Data Keymacro not only displays the data in a graphical way, but also displays the data in a numerical way. The graph shows a snapshot of the traffic state of the monitored network connection at any given time, while the number display shows the actual traffic amount at any given time. If you want to analyze the network traffic in detail, you can also scroll through the detailed data in the list. 5. Compatible with All Popular Windows OS Keymacro can be used on all popular Windows OS including Windows 7/8/10, Vista/XP/2003/2000. And it is
