I have a simple servlet, which takes username and password from html form and verifies if user credentials are correct, if not user is redirected to login page with an error message. Everything works fine when I login in or out with valid information, but I cant get it to work if I login with invalid credentials. I am getting the error message, but I dont redirect the user to the login page. Here is my servlet: protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { PrintWriter out = response.getWriter(); String username = request.getParameter("username"); String password = request.getParameter("password"); // system.out.println(username+" "+password); user user = userService.getUserByUsername(username); if (user!= null) { if (password.equals(user.getPassword())) { // do something } else { out.println("Invalid username or password!"); } } else { out.println("Invalid username or password!"); } out.close(); } A: Do it like this protected void doGet(HttpServletRequest request, HttpServletResponse response) throws ServletException, IOException { PrintWriter out = response.getWriter(); 3da54e8ca3
