This is also where we should add the answers to FAQs. Speeding Up Skybot Replaced? Hi all, I have been watching the Skybot forums for the last year or so as well as from the link in the welcome email for a while. Looking over the forum now (before it closes the forum down) the New Mailman looks to have changed the speed of the broadcasts. It used to take like 15-20 seconds after the mail was read to start the broadcast but now it takes like 45 seconds. I was never bothered by that and I was getting the time of day app on my mobile phone set to the correct time as well. Hope someone has some insight because I need this site for quick exchanges but I can't use it if it takes over 2 minutes to start. Thanks in advance, John. Greyed out textures Hey all. My problem is, sometimes when I load a presentation after a while, the textures for the first slide show up as grayscale, as if I used the "Texture Type" = "Sky" method for the sliding effect. This has only happened with this particular presentation; other presentations load correctly. Am I doing something wrong, or is this just an issue with ExpoSong or Windows 10? (I use Windows 8) Announcements Can I get a tool to allow me to add a little bit of text to a slide? I have a presentation with 5 slides and I want to have a little bit of text on each slide saying something like "Go to slide 2" and I'd like to be able to do this easily and avoid fussing with a text box on each slide. I am using Windows 10 Pro 64-bit. If this requires me to buy another program, that's okay, just so long as it is reasonably priced. I don't want to see any of this text when I go to slide 1. Only see this

ExpoSong Free Download [Mac/Win] 2022 [New]
