

[Ã .Ã .Ã .Ã .Ã .Ã .] [Ã .Ã .Ã .Ã .Ã .Ã .] [Ã .Ã .Ã .Ã .Ã .Ã .] [Ã .Ã .Ã .Ã .Ã .Ã .] [Ã .Ã .Ã .Ã .Ã .Ã .] [Ã .Ã .Ã .Ã .Ã .Ã .] [Ã .Ã .Ã .Ã .Ã .Ã .] The above lists are the example, it is not limited to the above list only, feel free to add your own lists and put them in the comments for more assistance. How to develop my own list? If I see a suspicious link I click it, I copy it to clipboard and then use custom search to search in text. I just need a command-line with a search-string like `grep --color=always` and then I can use this command for more advanced search. I believe I am able to get it like this: `sed..awk..lgrep--color=always` Thanks for the help. A: By limiting my searching to the HTML, I eventually got the solution for this. Thank you for all the proposals. ... `ll grep -A -n "index_of_my_string" -l "/index.php"` To check all files: ... `ll grep -A -n "my_string" -l -e "/index.php" -A` is for multiple occurrences. -l stands for a long listing (so a listing of full file names) -n stands for case-insensitive search This should be the working command for my case. Thanks for the suggestions. [UPDATE] Now I can script it like this: `for f in *; do [[-f $f &&! grep -q -e "/index.php" "$f"]] || grep -A -n "my_string" -l -e "/index.php" $f done` [UPDATE2] To extract the word from a HTML page
