Keymacro is a free  
software, best for people  
who like to create macros

---

to create music and generate songs on the fly, with great speed and quality. **MACRO Language:** Easy-to-use macro recorder program for use with Windows. Keymacro supports both keyboard and mouse. You can record macros in the keyboard, mouse, web browser, map, and DVD drive and more, all at the same time. You can record keyboard shortcuts as well as mouse clicks or keystrokes. This program has also been designed to be versatile, working with

---

both programs and websites. Keymacro allows you to create two macros, to loop or repeat a macro over and over again, and to repeat a macro in the reverse. You can also set a schedule to repeat a macro at intervals, for example, to record a macro every time you click a button on your mouse, or every time you pause a video. And of course, you can export macros to text files or to HTML or Windows Help files, for future reference. A built-in Help file will guide you through the

---

program, and if you are new to macros, it will walk you through the basics. Also included in the Help file is a Cheat Sheet which lists all the options in the program. You can start your own Internet radio station by using the Internet Radio Maker, with three free stations at no cost. The Internet Radio Maker allows you to create an unlimited number of personalized stations with your own favorite songs, or select from thousands of radio stations that are broadcast all over the

---

world. Also included is a free music search and recommendation tool. And the program can create music by using any song in your music library (CDs or MP3s), and it will auto play the song in a loop. You can also use your music collection to create your own unique song.

Compatible in 50 countries & on 1000s of phones. Chronic myelogenous leukemia in the elderly: treatment and

---

survival data from the German CML study group. To report data on therapy and survival of elderly patients treated for chronic myelogenous leukemia (CML) in Germany, the Groupe Européen de Curiethérapie and the Société Française de Myléodiseuse et de Lymphome de l'Adulte (GELLAM) organized a study for the first time of CML in the elderly. Data were collected on 175 patients (65% males) treated between 1980 and 1999. The median age was

---

74 years (range: 60-91) and 25% of patients were  $\geq 75$  years of age. Eighty-seven percent of patients had a low or intermediate Sokal risk and 89% of patients were in first chronic phase (CP-1) of CML. Splenomegaly was present in 81% of patients; extramedullary (EM) manifestations in 46% and thrombocytopenia in 14%. The administration of hydroxyurea (HU) was in 87% of patients. The overall complete response (CR) rate was 92% after one year, 81% after 5 years

---

and 73% after 10 years. Overall median duration of survival (OS) was 10.5 years (range: 0.7-24.2). Median OS for patients in CP-1 was 10.8 years, 11.3 years for patients in CP-2, 7.1 years for patients in CP-3 and 4.6 years for patients in CP-4. For patients with allogeneic stem cell transplantation (SCT), a reduced OS of
